See Summary of Record of Interview requirements on reverse side or on attached sheet.

Lan Vinh agree that the claim (claim 1), as originally recited, overcomes the combination of Polla and Ma. Mr Beale arguments that Polla does not teach "patterning the upper protective layer... upper electrode layer" and Ma does not teach forming a MEMS device on a flexible substrate is persuasive. In addition, claim language of "forming a sacrificial layer on a flexible substrate of the MEMS transducer" to further clarify claim 1 was also discussed
